

COVID-19 Quick Registration

A new COVID-19 Testing Quick Reg conversation has been built. It is available for use in PM OFFICE.

This quick reg should only be used for COVID-19 testing, not for visits or other services. This registration type suppresses billing and is not appropriate for other visits and services provided.

If a visit occurs that support E&M billing codes, use a clinic visit.

If patient is self pay, all services provided can be entered on the COVID-19 quick reg.

To reduce contact and transition of COVID-19, a verbal consent drop down has been added.

The screenshot shows a form with several tabs: "Patient Information", "Encounter Information", "Guarantor Information", and "Insurance Pri". The "Encounter Information" tab is active. The form contains several dropdown menus. The "Verbal Consent Obtained:" dropdown menu is highlighted with a red box and shows a list of options: "No" and "Yes". Other dropdown menus include "Mask Given:", "Patient Type:" (with "Clinic Non Provider" selected), and "Referral Source:" (with "Clinic or Physician Office Referral" selected).

Complete all information as required.

Order COVID19 testing, either through QUEST or PH depending on patient risk and symptoms severity.

Complete AMB/Travel Infectious Disease Screening form in Adhoc form

If necessary, complete narrative note
