

## Entrance Screening - COVID

**SCREENERS: All persons entering the building must have their temperature taken and asked about symptoms listed below. All should sanitize hands before entering. This includes patients, visitors, employees, and contractors. Everyone entering should be wearing a mask or approved face covering before entering.**

**Do you have any of the following symptoms?/ ¿Tiene alguno de los siguientes síntomas?**

- Fever / Fiebre *\*\*If a patient screened with an infrared thermometer presents with a fever, re-take the temperature with an oral thermometer. \*\**
- Cough / Tos
- Shortness of breath or difficulty breathing / Dificultad para respirar
- Chills/ Escalofríos
- Muscle Aches / Dolor muscular
- Headache / Dolor de cabeza
- Sore Throat / Dolor de garganta
- New loss of taste or smell / Nueva pérdida de sabor u olfato
- Congestion or runny nose / Congestion o moqueo
- Nausea or vomiting / Nauseas o vomitos
- Diarrhea / Diarrea

**Have you been tested for COVID-19 in the last 14 days? / ¿Se le ha hecho la prueba de COVID-19 en los últimos 14 días?**

**a. If yes, what were the results / ¿cuáles fueron los resultados?**

**If the patient answers “YES” to any of the above symptoms or if the patient had a positive or pending COVID result :** Provide the patient with a surgical mask and call the Point of Contact, typically a nurse, at your health center or department to further assess the patient. Keep the patient 6 feet away from others and obtain patient’s cellphone number, name, and date of birth. Nurse will assess patient and decide if patient should be seen in car, in clinic, or sent home and scheduled for telehealth visit.

**If the patient has no symptoms or had a negative result,** the patient can enter the building.

---

**Staff:** If you have symptoms you should put on a mask immediately, contact your manager/supervisor and follow their instructions.
